

TCP220 CompactPCI Carrier for 4 IndustryPacks®

Application Information

The TCP220 a standard 6U CompactPCI Carrier provides back I/O for up to four single-size or two double-size IndustryPack (IP) modules used to build modular, flexible and cost effective I/O solutions for applications in control, medical systems, telecommunication and traffic control.

Access to all IP I/O lines is provided by a PICMG 2.4 R1.0 compliant I/O mapping via J4 and J5. Status indicators for IP access, +5V and +/-12V are provided in the front panel.

The TCP220 can operate with 3.3V and 5.0V PCI I/O signaling voltage.

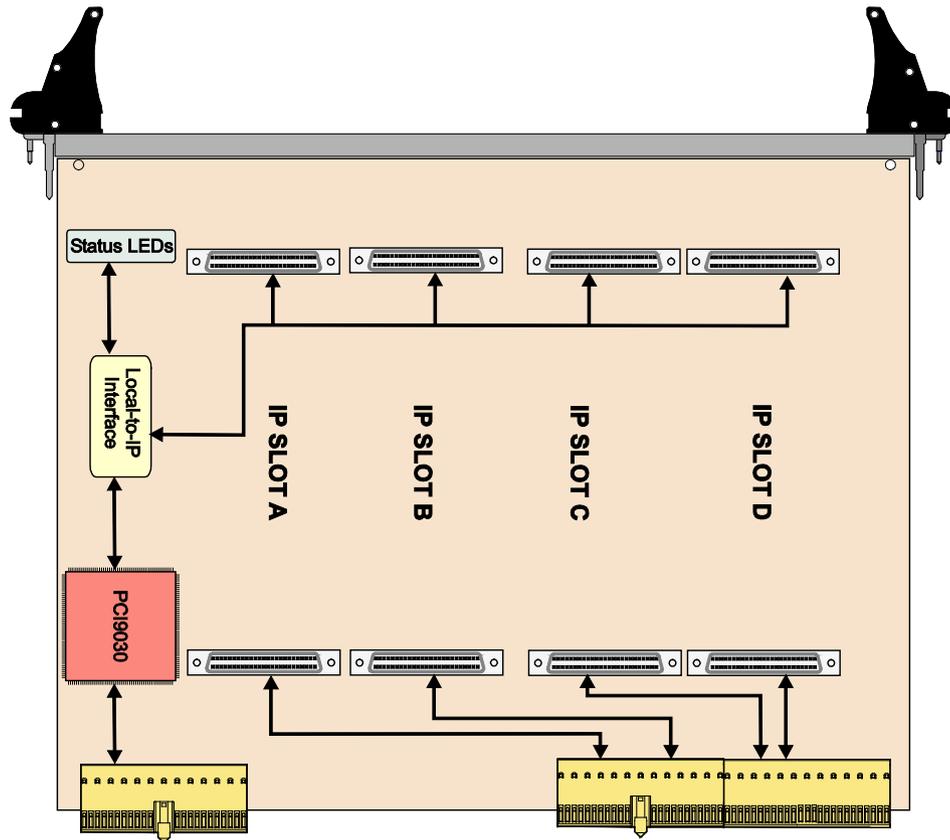

All IP interrupt request lines are mapped to PCI INTA. For fast interrupt source detection, the TCP220 provides a special IP interrupt status register.

The IP power lines are fuse protected by self healing fuses and RF filtered. The operating temperature range is -40°C to +85°C.

The TCP220 complies with the PICMG 2.0 Revision 3.0 CompactPCI specification.
