TCP886-10R

Four channel 10/100 Mbit/s M12 Industrial Ethernet interface front panel I/O, 32bit (cPCI Connector J1 only), extended temperature range (RoHS compliant)

TCP886-20R

Four channel 10/100 Mbit/s M12 Industrial Ethernet interface front panel I/O, 64bit (cPCI Connector J1 and J2), extended temperature range (RoHS compliant)

This document contains information, which is proprietary to TEWS TECHNOLOGIES GmbH. Any reproduction without written permission is forbidden.

TEWS TECHNOLOGIES GmbH has made any effort to ensure that this manual is accurate and complete. However TEWS TECHNOLOGIES GmbH reserves the right to change the product described in this document at any time without notice.

TEWS TECHNOLOGIES GmbH is not liable for any damage arising out of the application or use of the device described herein.

Style Conventions

Hexadecimal characters are specified with prefix 0x, i.e. 0x029E (that means hexadecimal value 029E).

For signals on hardware products, an 'Active Low' is represented by the signal name with # following, i.e. IP_RESET#.

Access terms are described as:

W	Write Only
R	Read Only
R/W	Read/Write
R/C	Read/Clear
R/S	Read/Set

1 Product Description

The TCP886 is a 3U 32bit/64bit CompactPCI module providing a four channel M12 Industrial Ethernet 10BASE-T / 100BASE-TX interface.

The TCP886 is equipped with a transparent PCI/PCI-X to PCIe Bridge which is capable of performing data transfer with a bus width of up to 64 bit at bus frequencies of up to 133 MHz depending on the product order option and the system backplane configuration.

The Bridge and a PCIe Switch provide access to the Intel 82574IT Fast Ethernet controllers. Each Ethernet interface supports 10 and 100 Mbit/s transmission rates for full duplex and half duplex operation and is equipped with a 32 Kbit Serial EEPROM.

The four front panel D-coded M12 connector Ethernet interfaces of the TCP886 are capable of performing an auto negotiation algorithm which allows both link-partners to find out the best link-parameters by themselves.

The TCP886 is widely user configurable via configuration and status register access over the CompactPCI bus. All ports are galvanically isolated from the Ethernet controllers and LEDs indicate network activities.

On the TCP886-10R only CompactPCI connector J1 is fitted which means that the module is limited to 32bit PCI bus width.

The TCP886-20R is additionally equipped with CompactPCI connector J2 which allows 64bit data transfer in a corresponding backplane system configuration.

The module meets the requirements to operate in extended temperature range from -40° to +85°C.

2 Technical Specification

PMC Interface		
Mechanical Interface	CompactPCI (cPCI) Interface conforming to PICMG 2.0 Revision 3.0 3U, 4HP	
Electrical Interface	PCI Rev. 3.0 compliant and PCI-X Rev. 2.0a compliant 66 MHz / 32(64) bit PCI and 133 MHz / 32(64) bit PCI-X 3.3V PCI signaling with 5V I/O tolerance	
On Board Devices		
PCI/PCI-X to PCIe Bridge	PI7C9X130 (Pericom)	
PCIe Switch	89HPES8T5A (IDT)	
Fast Ethernet Controller	For each interface: 82574IT (Intel)	
Ethernet Interface		
Number of Interfaces	4	
FIFO	For each interface: Configurable receive and transmit data FIFO, programmable in 1 KB increments	
Interrupts	Using PCI INTA, INTB, INTC and INTD	
I/O Connector	D-coded M12 (Harting 21 03 381 4410 or compatible)	
Physical Data		
Power Requirements	1500mA typical @ +3.3V DC (no link) app. additional 70mA per 100Mbit/s link	
Temperature Range	Operating Storage	-40°C to +85°C -40°C to +85°C
MTBF	TCP886-10R: 404000 h TCP886-20R: 379000 h MTBF values shown are based on calculation according to MIL-HDBK-217F and MIL-HDBK-217F Notice 2; Environment: G _B 20°C. The MTBF calculation is based on component FIT rates provided by the component suppliers. If FIT rates are not available, MIL-HDBK-217F and MIL-HDBK-217F Notice 2 formulas are used for FIT rate calculation.	
Humidity	5 – 95 % non-condensing	
Weight	TCP886-10R: 204 g TCP886-20R: 219 g

3 PCI Device Topology on TCP886

The TCP886 uses four Fast Ethernet Controllers (Intel 82574IT) each communicating via a PCIe Rev. 1.1 compliant x1 Interface. To be able to access the Ethernet controllers they are connected to the x1 Downstream Ports of a PCIe Switch (IDT 89HPES8T5A). The x4 Upstream Port of the Switch is connected to a PCI/PCI-X to PCIe Bridge (Pericom PI7C9X130) which communicates with the host system.

Table 4-1 : Intel 82574IT PCI Header

5 LEDs

The TCP886 provides four Status LEDs for quick visual inspection and debugging. A marking is placed close to each LED, to indicate the Ethernet Port the LED corresponds to.

Each Ethernet Port has one LED indicator. See figures below for more details:

LED Status	Description
OFF	No cable is connected or no link is established
ON	A link is established at the corresponding Ethernet Port
BLINKING	Indicates activity: The Ethernet Port transmits or receives data

Table 5-1 : LED Status

6 Pin Assignment – I/O Connectors

On the TCP886 the Ethernet signals are accessible by four D-coded M12 Connectors. The connectors are located in the CompactPCI front panel.

For pin assignment, see the figures below.

Pin	Signal
1	TX+
2	RX+
3	TX-
4	RX-
